SUMMARY

Computer Engineering student at the University of Central Florida seeking internship opportunities. Interested in web development, software development, and building practical projects using C, Python, HTML, CSS, and Astro. Bilingual in English and Portuguese.

EDUCATION

University of Central Florida

Fall 2025 - Expected 2029

B.S. Computer Engineering

Orlando, FL

Relevant Coursework: EGN 3211 - Introduction to C

TECHNICAL SKILLS

Languages	C, Python, HTML, CSS, JavaScript
Tools / Frameworks	Astro, Git, GitHub, VS Code, Linux CLI
Concepts	Responsive Design, Component Architecture, Version Control, Problem Solving
Human Languages	English, Portuguese

PROJECTS

Personal Portfolio Website - Astro, HTML, CSS, JavaScript

- Built a minimalist dark-mode portfolio to showcase projects, skills, education, and experience.
- Used component-based structure and responsive CSS to create an editable, mobile-friendly site.

C Programming Coursework - EGN 3211 - C, GCC, Linux

- Completed programming assignments covering functions, arrays, pointers, file I/O, and structured problem-solving.
- Practiced writing readable, efficient code and debugging compile-time and runtime issues.

Python File Organizer - Python, CLI

- Created a command-line automation concept to organize files by type and reduce repetitive manual work.

EXPERIENCE

Marketing / Operations Assistant - Arena Oriente

Dates TBD

- Managed Instagram/social media content and supported the arena digital presence.
- Created and configured live video streams for events, combining communication and technical setup.
- Built spreadsheets for cash control and operational organization, improving tracking and workflow clarity.
- Supported day-to-day operations using digital tools, organization, and problem-solving.

NOTES

Replace placeholders such as name, email, GitHub, LinkedIn, portfolio URL, and dates before applying.
